

Custom Rebates for Non-Residential Customers

Custom Rebate Amount

1. Retrofit = \$0.05 per first year kilowatt-hour (kWh) energy savings.
2. New Construction = \$0.05 per kilowatt-hour saved (kWh difference between Title 24 and installed equipment) for one year.
3. Rebate amount will not exceed 50% of the project cost (equipment plus labor).

Qualifications

1. Retrofit projects for existing operating equipment or new construction projects exceeding Title 24.
2. All projects must exceed all federal and state government-mandated efficiency standards.
3. Replacement equipment must operate for a minimum of 5 years.
4. Fuel-switching and co-generation projects are ineligible.

Savings Estimation

1. Only direct energy savings qualify. Energy savings due to interactive effects such as air conditioning savings associated with lighting controls do not qualify. Air conditioning savings due to load changes do not qualify.
2. TID reserves the right to verify project savings through independent measurement and evaluation.
3. TID reserves the right to approve or decline all proposed projects based upon independent measurement and evaluation.
4. Savings calculations must include product specifications, hours of operation, the derivation of baseline conditions and all other assumptions used to support estimates. Please include the output of any simulation programs used.

Application Process

1. Complete and sign the custom rebate application.
2. Submit the application with projected energy savings calculations and an estimate of project costs.
3. TID will contact you to schedule a pre-inspection.
4. TID will notify you of your approval for a rebate.
5. Notify TID of project completion and submit copies of itemized receipts that are paid in full.
